PEST CONTROL BUSINESS REGISTRATION

The Agricultural Commissioner wishes to emphasize certain items prior to registration, and to obtain the qualified applicator's signature to verify that these items have been reviewed.

1. Good communication among all parties is essential to reduce conflicts between field labor and pesticide applicators. Growers, Pest Control Businesses, Pest Control Advisors and Farm Labor Contractors are expected to cooperate with each other to avoid conflicts.
2. The Monterey County Posting Regulation requires that, in general, fields with a re-entry interval of 24 hours or longer be posted with warning signs. Fields requiring posting shall be posted prior to the start of the application and may be posted when an application is scheduled to begin within 24 hours. Violations of this requirement will go to the operator of the property treated.
3. Second parties performing repairs on contaminated pest control equipment must be informed of the hazards of the pesticides they may encounter and the methods of protecting against personal injury.
4. The General Permit Conditions outline the conditions by which all restricted material permit holders agree to abide. These conditions cover applications near schools and applications by aerial applicators. The conditions also contain Monterey County's NOI and Waiver Policy conditions. All restricted material permit conditions are available on our website at <http://www.co.monterey.ca.us/ag/forms.htm>.
5. In addition, certain permits may have more restrictive conditions based on local conditions. It is your responsibility to your growers to read and understand these conditions as well. If you have any questions, contact our office for clarification before the application.
6. Each person engaged for hire in the business of pest control shall report to the Agricultural Commissioner as soon as practicable, by the most expedient method, any emergency or accidental release of pesticide and the estimated amount.
7. Site identification numbers for pesticide use reports are to be made following the "Monterey County Site Identification Number Procedures." Accurate and consistent site identification is necessary to maintain the integrity of the use reporting system.

The Pesticide Safety Information Series (PSIS) A-1 through A-10 and N-1 through N-8 are available on DPR's website at <http://www.cdpr.ca.gov/docs/whs/psisenglish.htm>.
