FORM Utilities Detail

TO: All Utility Companies and Contractors

FROM: Department of Public Works, Monterey County

Gentlemen:

Please find attached drawings (3) outlining details for installing various utility structures within County right-of-ways in accordance with Department of Public Works Policy.

Be advised, however, that these drawings shall not supersede details shown on Subdivision Plans, included in Encroachment Permits or specific instructions found necessary by this Department in unusual circumstances. They also shall not relieve a utility company of the responsibility of locating utility poles in locations that will not constitute a hazard to public traffic.

Should there be any questions regarding utility locations, you are encouraged to call Department of Public Works, Permit Section, (831) 755-5025.
