Water Resources Agency

The Salinas River was the original main source for irrigation, but by 1872, farmers in the Salinas Valley turned to groundwater. By 1900, wells were so common to the point by 1930 there were concerns about seawater intrusion. Combined with continual flooding in the valley, the concerns prompted the formation of the Monterey County Flood Control and Water Conservation District (MCFCWCD) in 1947.

The MCFCWCD became the Monterey County Water Resources Agency (MCWRA) in 1991, with an updated mandate to provide for the control of flood and storm waters, conservation of such waters through storage and percolation, control of groundwater extraction, protection of water quality, reclamation of water, exchange of water, and the construction and operation of hydroelectric power facilities. MCWRA area covers all of Monterey County, including the Salinas Valley Groundwater Basin.

The MCWRA has a nine-member board. The board is made up of members appointed by the Monterey County Farm Bureau, Monterey Grower-Shipper Association, the County Agricultural Advisory Committee, five members appointed by the County Board of Supervisors (one from each district), and a member appointed by the Mayor Select Committee. The board is under the governance of the Monterey County Water Resources Board of Supervisors.

The MCWRA actively addresses the following Board Strategic Initiatives: Strategic Initiative No. 3 - Streamline County operations for greater accountability and efficiency of service delivery and cost savings; Strategic Initiative No. 5 - Plan and develop a sustainable physical infrastructure that improves the quality of life for County residents and supports economic development initiatives; and Strategic Initiative No. 6 - Promote the use of alternative energy sources and related best practices that benefit the environment.

The biggest challenge for MCWRA is halting seawater intrusion in the Salinas Valley Groundwater Basin, which was studied, identified and documented by the State of California Department of Public Works (who later became the Department of Water Resources) in 1946. Since the study in 1946, seawater intrusion has progressed steadily inland. The MCWRA has continued to study the seawater intrusion mechanisms and selected and implemented several projects to halt seawater intrusion.

MCWRA consists of five (5) Special Assessment Funds:

Fund 116 - Salinas Valley Water Project (SVWP) Zone 2C for Dam Operations & Maintenance and Administration;

Fund 131 - Castroville Seawater Intrusion Project (CSIP) Operations;

Fund 132 - Salinas Valley Reclamation Project (SVRP) Operations;

Fund 134 - Salinas River Diversion Facility (SRDF) Operations;

Fund 313 - SVWP Monterey Financing Authority Debt Service;

Five (5) Flood Assessment Funds:

Fund 112 - Pajaro Levee;

Fund 121 - Soledad Storm Drain;

Fund 122 - Reclamation Ditch;

Fund 124 - San Lorenzo Creek;

Fund 127 - Moro Cojo Slough.

In addition, the Agency also has three (3) funds that receive other sources of revenue such as Ad Valorem, Planning/ Permit fees, Grant and Reimbursement MOU's, and hydro-electric revenue:

Fund 111 - WRA Administration Fund;

Fund 130 - Hydro-Electric Operations; and

Fund 426 - Interlake Tunnel and Spillway Modification DWR Grant Project/Study (ILT).

Monterey County Water Resources Agency consists total of thirteen (13) funds in the agency.

Operating Budget: \$31,322,309
Positions (FTEs): 48.00

Summary of Recommendation

The FY 2019-20 Recommended Budget expenditures for Monterey County Water Resources Agency (MCWRA) programs is \$31,322,309 with anticipated revenues at \$25,520,259 and the use of \$5,802,050 from fund balance will provide a statutorily balanced budget. Budgeted unassigned fund balances at 06/30/2020 are anticipated to be at \$10,138,401.

Salaries and Benefits increased by \$87,510 from FY 2018-19 Adopted Budget due to pay increases, Social

Security Benefits (SSN-FICA), and post-retirement benefits. There is no increase in Services and Supplies for FY 19-20.

Overall estimated hydroelectric revenue changed from FY 2018-19 Adopted Budget due to the Agency predicts that hydroelectric revenues sales will be increased by \$120,000 due to a semi wet winter in beginning of 2019. This is a 20% increase from FY 2018-19 Adopted Budget and will give the Agency a little more ability to

invest more money into the repair of aging dam infrastructure. Even if with the little increase in hydroelectric, the Agency will still need to implement a 3.5% increase on most Agency Special Assessment and Flood Zones Assessment based on the increment of Cost of Living Adjustment (COLA).

Though MCWRA budget is statutorily balanced, the budget fails to meet the County of Monterey financial guideline of a structurally balanced budget. A structurally balanced budget matches ongoing sustainable revenue. MCWRA recognizes that a transition period will be required to achieve a structurally balanced budget. The Agency is working on interim and long-term strategic plans to meet County Fiscal Guidelines where fund balances are not used to sustain ongoing operations. The strategic plan will consider organizational restructuring with a focus on service level and financial sustainability, as well as fund balance growth and positive cash balances. Staff positions for FY 2019-20 Recommended Budget are forty (40) funded positions and nine (9) unfunded positions.

Budget Impacts

The 2017 Oroville Dam failure has increased the California Department of Water Resources - Division of Safety of Dams (DSOD) requirements to operate the dam safely and without failure. The Agency is currently working on repair estimates for Nacimiento and San Antonio Dams for FY 2019-20.

Prior Year Accomplishments

Agency continues to work on the Salinas River Channel Maintenance Program and long-term strategy using the California Coastal Conservancy grant of \$1,000,000 to keep the project moving forward including the Salinas River Lagoon as well as to prepare a Habitat Conservation Plan.

Agency continues to work with Santa Cruz County Flood Control and Water Conservation District on the U.S. Army Corps of Engineer for the Pajaro River Levee Project.

Agency continues to study the Interlake Tunnel and Spillway Modification Project using the \$10,000,000 grant from Department of Water Resources.

Budget Year Goals

Develop an interim and long-term strategic plan to render MCWRA structurally balanced, where estimated expenditures are matched with estimated revenues. MCWRA's focus is to meet County of Monterey Financial Guidelines and ongoing operations that are sustainable and not reliant on fund balance and onetime source of funds.

Establish a sustainable funding source or alternative requirement for the Salinas Valley Water

Project fish monitoring.

Establish funding sources for the Interlake Tunnel Project.

Develop a strategic plan for resolving reservoir real property issues.

Develop a strategy to move forward with a long-term Salinas River Channel Maintenance Program.

Pending Issues

Determination of the Agency's relationship with the Groundwater Sustainability Agency (GSA).

FUND 111 - WRA ADMINISTRATION FUND

THE FOLLOWING FUNDS HAVE BEEN COLLAPSED INTO FUND 111: 113, 114, 115, 117, 118, 120, 123, 125, 126, 128, & 129.

To provide basic water resources management and flood control services County wide through the following ongoing programs: Hydrology and Water Quality, Flood Plain Management & Developmental Services, Environmental Compliance, ALERT System Operations and Maintenance/Flood Monitoring. In addition, this fund supports non-operations and maintenance services for the Salinas Valley, Nacimiento and San Antonio Reservoirs such as ground water extraction/data collection, Lake Nacimiento dock registrations/fees, Well Permits/Well Log Maintenance, and Salinas Valley Water Quality/Nitrate Management.

Unit Description

FUND 112 - PAJARO LEVEE

To maintain the Pajaro Levee and adjacent river bench as a flood control structure according to US Army Corps of Engineers criteria in order to reduce potential flooding impacts from the Pajaro River. This fund supports the maintenance of the Pajaro Levee and adjacent riverbank by removing silt and controlling vegetation in

river channel adjacent to the Levee, subject to existing laws and regulations in form of permits. Agency staff coordinates levee and channel maintenance activities with Army Corps of Engineers, regulatory agencies, other agencies, and citizens of the Pajaro Valley. In addition, this fund supports the watershed effort of the Pajaro River Watershed Flood Prevention Authority and works with the Army Corps of Engineers to develop 100 year flood protection project.

Unit Description

FUND 116 - DAM OPERATIONS

To collect the SVWP special assessments, Nacimiento taxes and reimbursements with San Luis Obispo County. It supports operation and maintenance of Nacimiento and San Antonio dams to reduce flooding impacts on the Salinas River, and provide water conservation with consideration given to recreation.

Fund 116 is comprised of three (3) components:

- 1.a. Zone 2C Salinas Valley Water Project (SVWP);
- 1.b. Nacimiento & San Antonio Dam Operations and Maintenance;
2. SVWP Capital Asset Management Plan (CAMP);
3. Zone 2C SVWP Administration.

1.b. SVWP Zone 2C Nacimiento & San Antonio Dam Operation and Maintenance:

To support the maintenance and repairs of the dam embankment, outlet gates, roads, culverts, buildings and facilities, and the operation of equipment at the dam. It maintains the log booms protecting the inlet works of the dam, as well as operates the Low Level Outlet works, the High Level Gates, and the Obermeyer Gate on the spillway for conservation and flood control releases. In addition, this fund also provides for water rights, performs water quality sampling and analysis, oversees Agency property around Lake Nacimiento, provides for safety and security, and works with

the Monterey County Parks Department to administer recreation facilities at the lake. It also supports activities in the following ongoing programs: Salinas River Channel Maintenance Program, Salinas River Mouth Operations, Reservoir Operations Hydrology and Water Quality Program, ALERT Flood Warning System, Groundwater Extraction/Data Collection, and Invasive Species Program for Quagga and Zebra mussels in Nacimiento and San Antonio Reservoirs.

2. SVWP Zone 2C Capital Asset Management Program (CAMP):

To support the implementation of the Agency's Capital Asset Management Plan (CAMP) for the Nacimiento and San Antonio Reservoirs.

3. SVWP Zone 2C Nacimiento Administration:

To administer and collect the assessments and related technology, support the maintenance of the cattle leases, manage Agency land, and annex property into the Zone 2C. This fund also supports activities related to the Federal Energy Regulatory Commission and

California Department of Water Resources Division of Safety of Dams requirements, addresses legal concerns related to easements, lawsuits, leases, grants, and assessments.

Unit Description

FUND 122 - RECLAMATION DITCH

To operate and maintain the Reclamation Ditch to reduce flooding impacts. The Reclamation Ditch is the storm drain for a major portion of the City of Salinas. It is the outlet to the ocean for three Gabilan Mountain Streams, receives irrigation return water from adjacent farmlands, and drains approximately 157 square miles. This Fund supports work with the City of Salinas in developing Impact Fees for capital improvements. It maintains the Reclamation Ditch and related facilities by removing debris and silt to maintain grade from drainage channels for which the Agency has right-of-way. It repairs erosion to banks, maintains tide gates; and operates and maintains pumping stations. This fund pays for general liability insurance, electrical costs for pumping stations; management of vegetation, rodent control, and maintenance of culverts and other structures in the Reclamation Ditch. It supports the ALERT Flood Warning system and responds to citizen requests

for assistance on drainage and flooding matters in areas of Zone 9 by providing advice, with any construction of improvements to be considered in relation to the priorities set forth in the Zone 9 Operation Study.

FUND 130 - HYDRO-ELECTRIC OPERATIONS

To operate and maintain the Nacimiento Dam Hydroelectric Plant and to administrate the Power Purchase Agreement. The plant generates hydroelectric power at Nacimiento Dam. This fund supports the operation and maintenance of the Plant facilities. It provides security measures including lights and fencing around the Plant. The hydroelectric plant consists of two hydraulic turbine/generator units with a total capacity of 4.44 MW. The Agency is

required to provide data reports to California and federal power regulators, Power Purchase Agreement buyer, work with the Scheduling Coordinator and the California Independent System Operator.

Unit Description

FUND 134 - SRDF OPERATIONS

To provide for operations and maintenance of the Salinas River Diversion Facility (SRDF). Work includes SRDF operators from Monterey One Water under contract with the Agency to operate and maintain the inflatable dam, fish bypass system, river water pump station, pipeline, standpipe, filter screen station, and river water chlorination system, including chemical and utility costs. Also included are staff costs related to engineering and regulatory reporting requirements. This fund supports the collection of fish passage and habitat data in the Salinas River and tributaries pursuant to the NOAA Fisheries Biological Opinion for the Salinas Valley Water Project, which is an important component to the Salinas Valley Water Project's water rights permit. This includes monitoring fish at multiple locations on the Salinas River, Nacimiento River and Arroyo Seco River, collection of water temperature, dissolved oxygen and salinity at multiple locations and reporting to NOAA Fisheries. Costs for this work include field and office staff time, and consultant services; managing and monitoring water releases from Nacimiento and San Antonio

Reservoirs for delivery to the Salinas River Diversion Facility. This work includes staff time for coordination of river flow requirements with SRDF service area water demand, release operations at Nacimiento and San Antonio Dams, flow monitoring, record maintenance and reporting to Board of Directors and regulatory agencies (NOAA Fisheries and State Water Resources Control Board). The staff time for this task is incorporated in Fund 116, Reservoir Operations Hydrology and Water Quality Program and performs water quality monitoring efforts as they relate to the Operations and Maintenance of the SRDF. This includes deployment of constant-recording devices, as well as performing surface water sampling while the SRDF Rubber Dam is inflated. Surface water sampling also occurs in the Salinas River Lagoon. The staff time for this task is incorporated in Fund 116, Reservoir Operations Hydrology and Water Quality Program. Environmental compliance includes data collection and reporting to regulatory agencies pursuant to SRDF permits (NOAA Fisheries, U.S. Fish & Wildlife Service, State Water Resources Control Board, Regional Water Quality Control Board, California Department of Fish & Game). The remainder of environmental compliance cost is included in SRDF Operation and Maintenance.

Unit Description

FUND 426 - INTERLAKE TUNNEL PROJECT

To track the Department of Water Resources \$10 million grant to study the feasibility of an Interlake Tunnel between Nacimiento and San Antonio Reservoirs with modifications to the Nacimiento

Spillway. Operationally, the Interlake Tunnel would divert water from Nacimiento Reservoir to San Antonio Reservoir that would have otherwise been spilled at Nacimiento Dam. The Nacimiento River basin produces nearly three times the average annual flow of the San Antonio River basin, therefore, capturing high Nacimiento River flows and diverting those flows to San Antonio Reservoir increases the overall storage capacity of the system.
