Dear Planning Commissioners, Associate Planner Angelo and Members of the CAWD Board

I respectfully request that the current application be denied and that the District be directed to come back with a plan to replace the existing sewer in kind as proposed by Kennedy Jenks and its consultants that at the same time will meet all the environmental constraints applicable to the project at this location.

I do not believe that a small number of residents should bear the adverse consequences of this proposed project. I am one of the 127 residents from Carmel Meadows who signed the petition to block the implementation of the proposed replacement project. There is a far better alternative project that will not cause this small number of residents to suffer the adverse consequences.

Respectfully yours. Mark Abelson

Very truly yours,

Mark B. Abelson, Esq.
