Narrative: Monterey Environmental Health Bureau (EHB) received a call from County Comm regarding an active sewage spill located at 185 Las Lomas Drive in Royal Oaks. I called Fire Capt. Victor who was on-site, he estimated the spill had been occurring since 4 PM at about a 5-gallon per minute rate. He also indicated they requested Monterey County Public Works to come out and help contain the spill with a vacuum truck. I arrived on-scene, indentified the spill was actively releasing at a cleanout spot in the street and flowing into a culvert on the side of the street. I walked further down the street to evaluate where the culvert leads and was told by the residents that it leads to a creek downhill. I did further assessment uphill from the location of the spill, and identified another manhole in a driveway that was also actively releasing. The sewage was flooding the front yard of the property on 183 Las Lomas Drive. I talked to the resident at that location and he indicated the sewage had been releasing since 12 noon. Another resident directly behind his property, at 175 Las Lomas Drive was also complaining of sewage spilling out in their front yard. I checked with County Public Works who updated me they had requested both Greenline Co. and Don Chapin Co. for assistance but only had limited resources and personnel. Public Works was also in contact with Castroville Water District, who sent their hydrojet truck to assist in clearing the main sewage line. The main sewage line was eventually cleared which stopped the release. I requested the vacuum truck to pump out the remaining sewage that pooled on the street since it was starting to rain. I cleared the scene around 10:45 PM.

Incident Status:

Mitigated No Further Action | Health Department Follow-up Warranted

Referred to other Agency or Department for follow-up: [Monterey County EHB Healthy Housing Services program](#)
