FY 22 23	4,555	8,321

Percentage of Clients Served - 10 Year Trend

What was the timeliness of services provided post hospitalization for the safety net population*

A key performance indication for mental health service delivery is the response to clients after psychiatric hospitalization. Appropriate and timely follow-up care helps reduce the risk of repeat hospitalization. A nationally recognized best practice involves follow-up with a client within 7 days after a crisis even or psychiatric hospitalization.

Our goal is to increase the percentage of clients seen within 7 days. These clients received the optimal care.

Age range: 0-15

*Note: The safety-net population is defined as Medi-cal clients that received one or more services within the fiscal year

WHAT IS THE IMPACT OF SUBSTANCE USE IN OUR ADULT SYSTEM OF CARE CLIENT POPULATION?

The severely mentally ill population served by the Adult System of Care involves serving many individuals who in addition to having a mental health diagnosis also have a substance use disorder diagnosis. We refer to this as co-occurring disorders. To best serve this group, we can enhance the use of co-occurring capable evidence based practices.

FY 22/23	Count of clients	Average of Total Cost	Sum of Total Cost	% of Cost	% of Population
Co-Occurring	1080	\$ 28,128.31	\$ 30,378,570.49	59.3%	50.8%
Non Co-Occurring	1044	\$ 19,963.04	\$ 20,841,414.80	40.7%	49.2%
Grand Total	2124	\$ 24,114.87	\$ 51,219,985.29	100%	100%

VARIANCE IN AVERAGE COST BETWEEN ADULT SYSTEM OF CARE CLIENTS FOR FY2021/22

50.8%
Of Adult System of Care clients have a co-occurring diagnosis.

Clients with a co-occurring diagnosis receive on average **\$ \$8,165.27 (32%)** more in services than clients without a substance use diagnosis.

System of Care: Access to Treatment

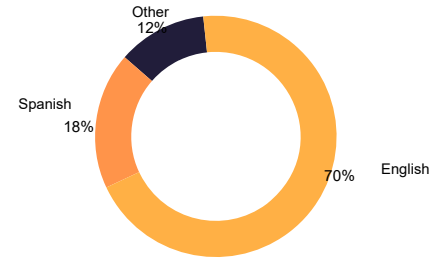

Access to Treatment programs are primary entry point for eligible county residents of Monterey County seeking mental health services. After an initial assessment, treatment services are typically provided in group settings and/or individual counseling sessions that focus on skill-building and support. In addition, specialty counseling services for LGBTQ, HIV/AIDS, and persons with cultural/linguistic needs, are provided by Behavioral Health and/or our community partners

System of Care: Adult System of Care (ASOC)

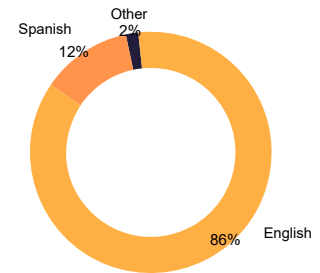

Monterey County Behavioral Health staff collaborates with local agencies to provide a range of services to adults ages 18 years and older with serious and persistent mental illness. The overarching goal is to help consumers establish and/or maintain independence, self-sufficiency and recovery through the provision of integrated health care services that includes psychiatric, mental health, physical health and case management services. These services are provided at locations in three (3) regional clinics (Monterey Peninsula, Salinas, and Soledad/King City). The primary goal is to maintain clients in the least restrictive environment to enhance quality of life.

System of Care: Crisis, Mobile Crisis, Hospital and TAR

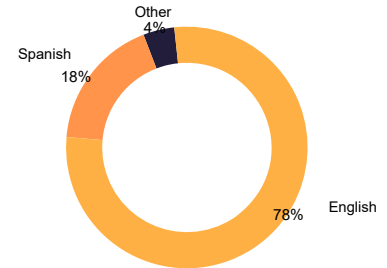

Crisis / Mobile Crisis intervention services are provided by County Behavioral Health staff who intervene in situations where an individual's mental or emotional condition results in behavior that may pose an imminent risk of danger to self or to another, or in situations where an individual may be gravely disabled due to a mental health condition. Psychiatric inpatient treatment in an acute hospital setting is provided to individuals on WIC 5150 / 5585. Short-term crisis residential services, an alternative to hospitalization, is available for individuals 18 years of age and older who are experiencing an acute psychiatric episode or crisis, and who do not meet the criteria for acute psychiatric inpatient care. This service is provided by a local agency. State hospitals provide mental health services for individuals on a forensic commitment, as well as for individuals who are under LPS conservatorship and require a secure treatment setting.

System of Care: Substance Use Disorders

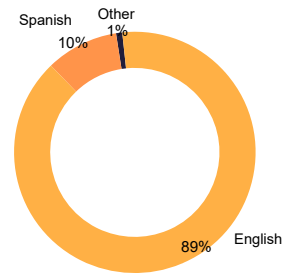

Services are provided on a continuum of care ranging from regularly scheduled counseling sessions in an outpatient setting to more highly structured, intensive 24-hour recovery support. Monterey County residents age 18 years and above with a diagnosis of alcohol or other substance use disorders are eligible for the continuum of SUD services. Intravenous drug users (IVDU), HIV+, and pregnant individuals receive priority admission. Narcotic or Opioid treatment services are available to Medi-Cal eligible adults with a primary diagnosis of dependence to heroin or other opiates; which serves to stabilize and decrease addiction. Substance Use Disorder Services are also available for adolescents ages 12-17 with a diagnosis of alcohol or other substance use disorder. All Substance Use services are provided by local agencies who use ASAM (American Society for Addiction Medicine) criteria to support holistic, individualized and person-centered treatment.

Service Area: Adult Mentally Ill Residential Placement

This service area includes treatment to adults living in intensive residential support settings. The range of intensive residential services, from Napa State locked facility to local intensive programs such as drake house. These services provide wellness/recovery oriented services in a supervised and supportive residential setting. To avoid placements at higher, more costly levels of care, services focus on stabilizing the individual's psychiatric condition through medication management and support services; restoring the individual's level of functioning in the community and in a lower level of care; increasing the individual's motivation and skills toward self-restoration; and prevention or decreasing the rate of de-compensation.

Service Area: Adult System of Care (ASOC)

Monterey County Behavioral Health staff collaborates with local agencies to provide a range of services to adults ages 18 years and older with serious and persistent mental illness. The overarching goal is to help consumers establish and/or maintain independence, self-sufficiency and recovery through the provision of integrated health care services that includes psychiatric, mental health, physical health and case management services. These services are provided at locations in three (3) regional clinics (Monterey Peninsula, Salinas, and Soledad/King City). The primary goal is to maintain clients in the least restrictive environment to enhance quality of life.

Service Area: Juvenile Justice System

County Behavioral Health staff provides outpatient services to youth at risk, prior to involvement with the Juvenile Justice System, as well as to adjudicated youth who are at risk of re-offending criminal behavior, and their families. Services are provided in clinic, community, school or institutional settings, i.e. Juvenile Hall and the Youth Center. Aftercare services to support youth in productive planning to re-enter the community and to reduce recidivism are also provided. A local agency provides transitional supported housing for young males (ages 16 to 21) participating in the Juvenile Justice System of Care's programs.

Service Area: Student Mental Health Services

County Behavioral Health staff serve children who are in special education and are referred by a school psychologist. The services include individual and family counseling, group counseling, teacher consultation, psychiatric evaluation, and medication monitoring. County Behavioral Health staff also provides mental health services to students who are demonstrating emotional or behavioral difficulties that are interfering with their social, academic and emotional functioning, yet are not in special education. Services are provided in primarily at the school site as well as the clinic and in the community. A local service provider offers mental health services to North Monterey County children attending schools in the Pajaro/Las Lomas area and their family members who have a broad range of mental health needs.

Service Area: SUD - Intensive Services

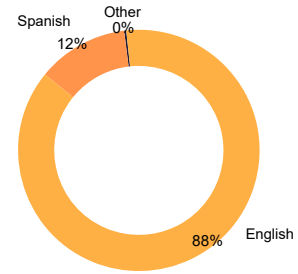

Intensive outpatient programs offer services to individuals seeking structured programming. IOP is offered on a continuum of care and appropriateness for this level of care can be determined through an ASAM (American Society for Addiction Medicine) screening and multidimensional assessment. IOP treatment includes a prearranged schedule of core services (e.g., Counseling (individual and group using evidenced based practices), patient education, family therapy, and integrated care coordination for substance use, behavioral health, & physical health needs) for a minimum of 9 hours per week for adults or 6 hours per week for adolescents (Mee-Lee et al., 2013). To help individuals fulfill their person-centered goals, IOP incorporates other in-house treatment components like assessment, recovery services, peer support, mutual support groups, medication services, and medication assisted treatment (MAT) for alcohol, opioid, & other substance use disorders.

Service Area: SUD - Medication Assisted Treatment

Narcotic or Opioid treatment services use pharmacological modalities and psychosocial counseling services to treat adults with a primary diagnosis of dependence to heroin or other opiates. Medi-Cal eligible adults will receive a physical examination by licensed medical professionals who are addiction experts and substance use history will be gathered by the treatment team. Pharmacological agents include opioid agonist medications such as methadone and Buprenorphine and opioid antagonist medications such as naltrexone. OTPs are heavily regulated by federal agencies and involve direct administration of medications, daily, and do not involve prescriptions taken to a retail outpatient pharmacy to access medication. In addition to providing pharmacological medications, all individuals receive one-on-one harm reduction counseling by highly trained professionals where a person-centered treatment plan is developed to achieve one's recovery-oriented goals.

Service Area: SUD - Outpatient Services

Outpatient Treatment Centers allow individuals to receive treatment for alcohol or substance addiction while continuing with daily activities like school or work. OP services are part of a continuum of care and appropriateness for OP can be determined through an ASAM (American Society for Addiction Medicine) screening and multidimensional assessment. Service components include assessment, integrated care coordination for substance use, behavioral health, and physical health needs, counseling (individual, group, family), medication services, medication assisted treatment (MAT) for alcohol, opioid, & other substance use disorders. OP also provides the following: addiction & recovery info, 12 Step program facilitation, individualized treatment planning, communicable illness education, toxicology drug screening, discharge planning, referrals to community resources, continuing care support groups. The programs utilize several evidence-based best practices, including relapse prevention, motivational interviewing, cognitive-behavioral skills, trauma-informed treatment, and psycho-education.

Service Area: SUD - Recovery Services

Recovery Services are designed to support recovery and prevent relapse with the objective of restoring an individual to their best possible functional level. Recovery Services emphasize a person's central role in managing their health, use effective self-management support strategies, and organize internal and community resources to provide ongoing self-management support to the individual. Medi-CAL members may receive Recovery Services based on self-assessment or provider assessment of relapse risk. Individuals no longer need to be diagnosed as being 'in remission' to access Recovery Services. Recovery Services can be provided while receiving MAT services, including NTP/OTP services. Additionally, an individual may receive Recovery Services immediately after incarceration with a prior diagnosis of alcohol or substance use disorder. Recovery services provides the following components: assessment, integrated care coordination for substance use, behavioral health, & physical health needs, counseling (individual, group, family), recovery monitoring-which includes recovery coaching and monitoring, and relapse prevention-which includes interventions designed to teach individuals how to anticipate and cope with the potential for relapse.

Service Area: SUD - Residential Services

Residential is a short term (length of treatment varies by individual, approximately 1-3 months), treatment program that provides 24-hour structure and support for eligible Medi-Cal adults with a diagnosed alcohol or substance use disorder. Residential is part of a continuum of care and entry into this level of treatment must be determined through an approved ASAM (American Society for Addiction Medicine) multidimensional assessment. Individuals participating in this level of care reside on-site at the residential facility. Services include counseling (individual and group), family therapy, 12-step recovery programs, peer support groups, recovery services, medication assisted treatment (MAT) for alcohol, opioid, & other substance use disorders, and integrated care coordination for substance use, behavioral health, & physical health needs. Residential services can also include non-medical withdrawal management for individuals meeting withdrawal criteria. Specialized services for women and their children are available in the residential program

Program/Program Group: Access CALWORKS

The Plan provides for a CalWORKs Employment Assistance Program (EAP) staffed by the Behavioral Health Bureau of the Health Department that works on-site, co-located with DSS staff, to conduct assessments of CalWORKs customers. The Plan briefly describes the referral, case management, and treatment and rehabilitation services that will be available to CalWORKs customers. The focus of treatment for CalWORKs participants will be on overcoming mental health issues that are related to employment. Treatment services will be brief and issue-focused in nature. The Plan also describes assessment of CalWORKs customers for substance abuse and dependence disorders and referral into the community substance abuse provider network for services.

Program/Program Group: Access to Treatment GAP Services

The Gap Program is designed to expand service capacity and provide quality follow-up care to clients who have recently experienced an acute psychiatric crisis and are at risk for crisis intervention and/or psychiatric inpatient placement. The primary objective is to provide therapeutic support and linkage to both county and community resources so that use of crisis/inpatient placement services can be greatly reduced. This program intends to serve clients of all ages and will be available to individuals who are limited in their ability to pay.

Program/Program Group: Prop 47 Mental Health

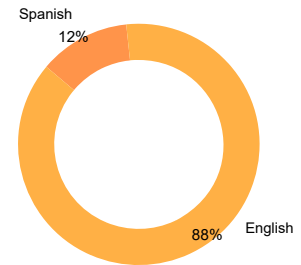

The Prop 47 Behavioral Health program is tied to the Prop 47 Grant awarded to Monterey County Behavioral Health. The grant funds an array of services in Monterey County designed to improve recidivism rates of individuals with prior involvement in the legal system who also have a history of issues with substance use disorder and/or mental health. The direct service component of the Prop 47 Behavioral Health program functions as an access point to mental health services for those individuals who are identified as the target population and eligible for grant services, and who have been referred for assessment of mental health needs. After an initial assessment, treatment services are typically provided in group settings and/or individual counseling sessions that focus on skill-building and support.

Program/Program Group: The Village Project Inc

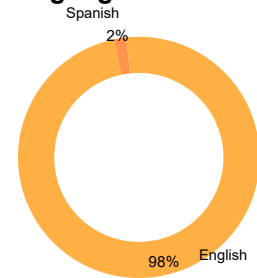

This program is a unique response to the critical need to provide African Americans with intervention strategies that address issues that impact individuals and families of color. The Village Project has become an integral part of the community and serves as a focal program where individuals and families can access a range of culturally competent mental health and supportive services. The Village Project utilizes licensed clinicians, social workers, counselors, as well as interns who have specific expertise and training in working with African Americans. The Village Project works in collaboration with other community based organizations providing mental health services to ensure that services are culturally competent. Referrals are made through the community, faith based organizations and schools.

This Provider provides Therapeutic Behavioral Services (TBS) to Monterey County Medi-Cal recipients up to the age of 21 who meet medical necessity criteria for treatment. They are in need short-term, one to one, intensive behavioral support in addition to other mental health services they are receiving. These services are provided to help the children/youth avoid placement in a higher level of care, or successfully transition to a lower level. There are exclusionary criteria under which TBS services will not be utilized. For further clarification contact the TBS Coordinator for Monterey County Children's Behavioral Health.

Program/Program Group: DTH Co-Occurring Disorder

ICT is an MHSA program, a Full Service Partnership, (FSP), and a contract with Door to Hope. This team provides a high level of care to co-occurring youth and their families. ICT is designed to prevent youth from having to be placed out of the home, who may be struggling with a co-occurring disorder. It is offered to youth ages 12 -18, who meet the co-occurring criteria and are at risk of out of home placement. This team provides individual and family therapy, as well as peer mentor support. The desired outcomes include measuring success in education, decreasing recidivism, prevention of further involvement with the Juvenile Justice system, and providing treatment in a less restrictive setting. Success is measured by youth's ability to remain at home, in school, and in their community, with no new law violations. This is a Mental Health Services Act (MHSA) program, under the co-occurring strategy. It is one of the substance abuse programs designed to meet moderate to severe needs.

Program/Program Group: CS Education Related Services

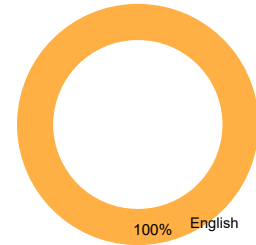

The Outpatient School Team serves only children who are in special education and who are referred by a school psychologist. The pupil may be exhibiting an emotional disturbance such as depression, anxiety or a psychosis that may be interfering with the student's educational progress. The services provided include Pre-referral services per Chapter 493 for short term intervention which includes an initial assessment with possible recommendations for services or for a full Chapter 26.5 assessment if found qualified under the department guidelines. The services can include individual and family counseling, group counseling, school teacher consultation, psychiatric evaluation and medication monitoring.

Program/Program Group: CS Family Reunification FSP

Family Reunification Program is a unique and innovative program model that truly integrates Children's Behavioral Health (CBH) therapists and Family and Children's Services (FCS/DSS) social workers into one cohesive service unit. The full FRP staff is co-located, co-supervised, and cross-trained to each other's jobs. At full staffing there are three FCS social workers, permanently teamed with three clinicians from CBH. Paired in teams of two for each FRP family, they share a caseload together and jointly provide services and case management to their families. They jointly share responsibility for case planning, provision of intensive therapeutic and support services, case monitoring, family team leadership, decision-making, and managing and leading orientation and other groups. The target population for the FRP program is: those families who are court-ordered to receive family reunification services from DSS after children have been removed from the home due to severe abuse or neglect and; have significant mental health needs and; face greater-than-normal challenges in safely reuniting and creating a stable home environment that will support the mental health and emotional needs of their children.

Program/Program Group: CS FAST Dependency Unit

The FAST Treatment Team provides mental health treatment and case management services to children and their families who are involved in the Monterey County Dependency Court and Child Welfare system due to severe abuse and neglect. The types of therapy provided include individual therapy, attachment work, group therapy and family therapy. The FAST Team utilizes a systems perspective in working with families, typically with a team of therapists providing therapy to many (if not all) family members. This results in a highly collaborative, cohesive and stimulating treatment team approach to much of our clinical work.

Program/Program Group: CS JJ CALA MH Court

The Behavioral Health Juvenile Justice Team provides the Hope for Youth/Esperanza para los Jovenes program, an expansion and enhancement of the County's Juvenile Treatment Drug Court. Adjudicated youth between the ages of 14 and 18, receive evidence-based substance abuse treatment and mental health services. Outcomes include substantial reductions in substance use, mental illness, and recidivism, and increased successful graduation from the Drug Court. Hope/Esperanza assesses and treats every client, providing sustained Motivational Interviewing and psycho-educational, therapeutic groups using the Teen Matrix Model. Treatment is provided by bicultural and bilingual staff. Both approaches are recognized by the Substance Abuse & Mental Health Services Administration as effective, evidence-based practices. Families are involved through home visits, participation in drug court sessions, and other treatment as needed.

Program/Program Group: CS JJ JSORT

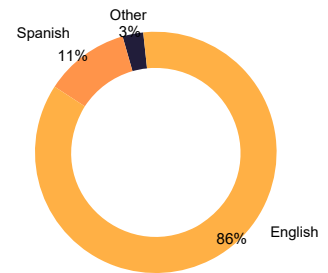

The Juvenile Sex Offender Response Team (JSORT) offers treatment to adolescents with sexual offender charges, in collaboration with the Probation Department. JSORT meets as a multidisciplinary team in order to meet the needs of the youth and family. Referrals are made through the Probation Department, and youth are assessed for the program. Services are implemented, in individual, group and family modalities. This team meets regularly to discuss the cases and treatment, and efforts are made to reduce the risk of re-offending and to plan reunification services for returning the offender to the home and community, with all safety factors considered.

Program/Program Group: CS JJ Juvenile Hall

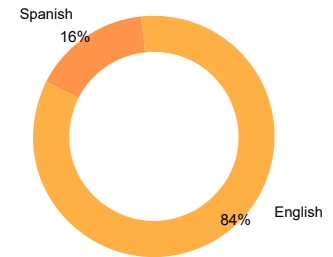

County Behavioral Health staff provides outpatient services to youth at risk, prior to involvement with the Juvenile Justice System, as well as to adjudicated youth who are at risk of re-offending criminal behavior, and their families. Services are provided in clinic, community, school or institutional settings, i.e. Juvenile Hall and the Youth Center. Aftercare services to support youth in productive planning to re-enter the community and to reduce recidivism are also provided. A local agency provides transitional supported housing for young males (ages 16 to 21) participating in the Juvenile Justice System of Care's programs.

Program/Program Group: CS JJ Secure Track Custody

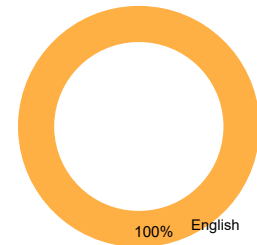

Monterey County Juvenile Hall provides pre-adjudication and post-adjudication services to youth on Juvenile Probation. CS JJ Secure Track is a post-adjudication service that was created as a result of SB 823 and the closure of Division of Juvenile Justice state facility, to serve the most serious juvenile offenders in Monterey County. Secure Track is an interdisciplinary team program (made up of Behavioral Health, Probation, Education, and Nursing) designed to rehabilitate youth sentenced to the program. Terms can range from 1-7 years or "juvenile life" (age 25). Secure Track provides a full continuum of mental health care, with a heavy focus on life skill development and risk management.

Program/Program Group: CS JJ Secure Track Outpatient

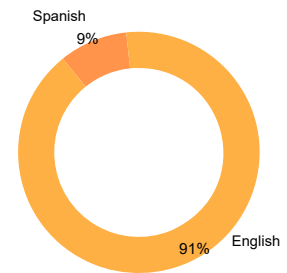

CS JJ Secure Track Outpatient services are designated for those high custody youth who were discharged from the state Division of Juvenile Justice (prior to their hard closure in June of 2023) as well as our local Secure Track program to support re-entry into the community. The goals of this program are to support healthy reintegration to the community, normalize the challenges related to institutionalization, decrease the chances for recidivism, provide outpatient mental health care, and to provide referrals that may be necessary for continued success once in the community.

Program/Program Group: CS JJ Youth Center

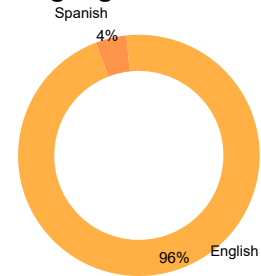

The Monterey County Youth Center delivers services to 60 male, at-risk, adolescent youth, adjudicated by Juvenile Court. Youth serve detention for 9 months, and are provided aftercare for 3 months. Staffing is a collaboration between Probation, Behavioral Health, California Forensics Medical Group, and Monterey County Office of Education. Behavioral Health delivers mental health services, primarily in group modality, implementing Aggression Replacement Therapy, and the Seven Challenges curriculums. Behavioral Health also provides individual and group family treatment.

Program/Program Group: CS JJ YouthBuild

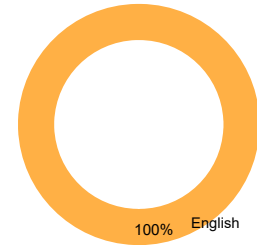

YouthBuild, Youth Corps, and Drummond Culinary Programs will be supported by one Behavioral Health PSW, on the Rancho Cielo Campus. The Aggression Replacement Training, (ART), program will be delivered to these youth, in group modality. There will also be individual and family treatment offered. Youth are ages 16-25 in these programs. We will use Motivational Interviewing and Seeking Safety in this implementation, both evidence-based practices. Behavioral Health has been involved in successful collaborative efforts with the Rancho Cielo programs, and continues to provide onsite services. We are committed to offering onsite services to the YouthBuild Program, with the same collaborative spirit.

Program/Program Group: CS New Paths Program

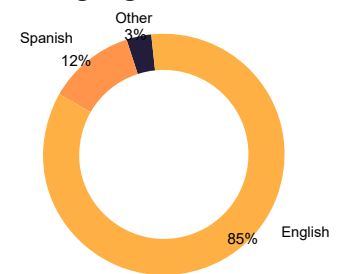

New Paths offers two levels of services for children, youth, and families in Monterey County. The first level of service is Post Hospital which ensures that children and their families are cared for and supported through a Psychiatric emergency with the goal of stabilizing. The Children's Post Hospital team receives referrals from emergency rooms and hospitals for youth under the age of 18 years old, supporting the discharge process for clients who are already open to the Children's System of Care or opening clients who are not receiving services. The Post Hospital Team is an Intensive Outpatient Program, focusing on psychiatric stabilization and short term, intensive treatment up to 12 weeks. Once stabilized, client's are opened to the New Paths portion of the program or connected to other Children's teams.

The second level of service is New Paths Outpatient Treatment, which is geared towards helping the youth after the crisis event and support the development of a "new path" to health and wellness. New Paths provides services to youth across Monterey county and the team is stationed in Salinas. The second level of services provides long-term treatment to youth under 18 years old, referred by the Access teams and Post Hospital. Treatment offers individual therapy, groups, case management, mental health rehabilitation, family psycho-education, and medication support.

Program/Program Group: CS Salinas Home Partners

The Home Partners Program is an intensive, short-term, in-home crisis intervention and family education program. It is designed to prevent the out-of-home placement of children whose emotional, social, and/or behavioral problems create a substantial risk of placement in publicly funded care, such as foster homes, group homes, correctional institutions or psychiatric facilities. This program is designed to defuse the immediate crisis, stabilize the environment, and assist families to develop more effective parenting skills and coping abilities. The principal characteristics of this program include interventions at the crisis point, treatment in the client's environment, 24 hour therapist availability, treatment that is highly individualized and concrete services as needed. Services are provided intensively and as needed for up to 20 hours a week, over a 4-6 week period. Therapist only carry a caseload of two families at a time to allow for intensive, frequent contact in order to maximize learning opportunities and work on the basic concrete and hard services needs a family may have. Mental Health Services Act (MHSA) supports this program to ensure access by monolingual families. This part of the program is referred to as: MHSA Family Preservation Program.

Outpatient services include individual, family and group therapy. Medication evaluation and follow up is provided at each clinic site. Case management is considered an essential component of treatment and intensive case management is provided to youth in out of home placement. Referrals are made through the Department of Social Services and Probation Department, local school district's Special Education Departments, and local hospitals. Community referrals are possible but are screened to ensure compliance with the target population. Specialized programs include early mental health intervention programs in local school districts, Safe Schools/Healthy Students Grant providing school-based mental health services in selected Salinas Schools and Proposition 10 funded programs in Children's International Day Care Centers. Parent Partnership Information and Support is available through all clinic sites.

Program/Program Group: CS TBS Coordination

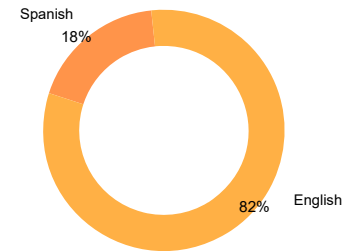

Therapeutic Behavioral Services (TBS) are monitored and authorized by the TBS coordinator. TBS is provided to Monterey County Medi-Cal recipients up to the age of 21 who need short-term, one to one, intensive behavioral support in addition to other mental health services they are receiving. These services are provided to help the children/youth avoid placement in a higher level of care, or successfully transition to a lower level. There are exclusionary criteria under which TBS services will not be utilized. For further clarification contact the TBS Coordinator for Monterey County Children's Behavioral Health.

Program/Program Group: DTH MCSTART

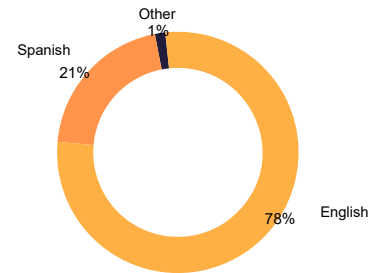

Provides Mental Health Services to eligible infants and children who require early intervention services. The primary focus of the program will be to identify, assess, refer, and treat children affected by the broad spectrum of developmental, social/emotional, and neurobehavioral disorders caused by perinatal alcohol and drug exposure. Such interventions will improve the child's development, improve the child's health, improve family functioning, and reduce the possibility of future residential care, out-of-the-home placement, and/or hospitalization

Program/Program Group: ReMind - Family Service Agency of San Francisco

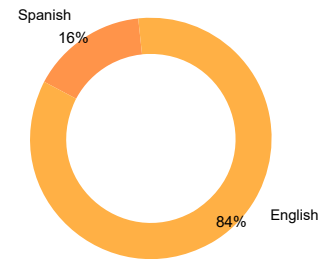

Currently known as "ReMind", the PREP program is a community partnership between The University of California, The Family Services Agency of San Francisco, The Mental Health Association of San Francisco, Sojourner Truth Foster Family Service Agency, Larkin Street Youth Services, and Child Crisis Community Behavioral Health Services Department of Public Health. PREP is committed to transforming the treatment and perception of early psychosis by intervening early with evidence-based, culturally-competent assessment and diagnosis so that in 5 years most cases of psychosis are treated to remission. Our mission is to deliver comprehensive, conscientious and multi-faceted treatment grounded in wellness, recovery and resilience to people experiencing signs and symptoms of psychosis, as well as their families

Program/Program Group: Jana D Todd JDT Consults

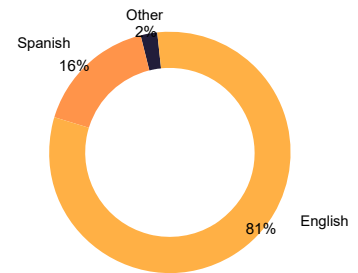

This program provides TBS services - Therapeutic Behavioral Services (TBS) are available for eligible children who need short-term behavioral support in addition to any other mental health services they are receiving. TBS's goal is to help children avoid being placed in a higher level of care such as a residential treatment facility or to help children make a successful move to a lower level of care such as returning home after residential treatment. TBS is a short-term program that focuses on changing a child's behavior, while emphasizing the child's strengths. TBS works in collaboration with the child, the child's caregivers and the primary mental health provider to address 1 to 3 behaviors that jeopardize the child's ability to remain in his or her current home.

Program/Program Group: Kinship Adoption FSP Seneca

Kinship Center provides Mental Health Services and Medication Support to youth who require outpatient services. The focus of the program is permanency for children, the impact of adoption on a child and his/her family, and the impact on children being raised by a relative caregiver. Such services will reduce the possibility of future residential care, periodic inpatient hospitalization, placement at out-of-state facilities, or placement in a juvenile justice facility. The D'Arrigo Children's Clinic provides outpatient mental health services to eligible children and their families. Mental health services refer to those individual, family or group therapies and interventions that are designed to provide reduction of mental disability and improvement and maintenance of functioning consistent with the goals of learning, development, independent living and enhanced self-sufficiency.

Program/Program Group: Services to Education

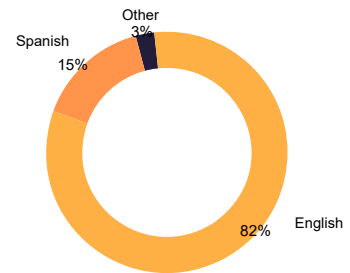

The Outpatient School Team serves only children who are in special education and who are referred by a school psychologist. The pupil may be exhibiting an emotional disturbance such as depression, anxiety or a psychosis that may be interfering with the student's educational progress. The services provided include Pre-referral services per Chapter 493 for short term intervention which includes an initial assessment with possible recommendations for services or for a full Chapter 26.5 assessment if found qualified under the department guidelines. The services can include individual and family counseling, group counseling, school teacher consultation, psychiatric evaluation and medication monitoring.

Program/Program Group: TAY Avanza FSP

The Avanza program nurtures and empowers youth and young adults ages 16 through 25 who have mental health disorders by providing comprehensive case management, therapy, groups and opportunities for positive social interactions. The program provides assistance with removing barriers related to mental health issues and helps youth move forward in their goals related to employment, education, independent living skills, and personal functioning. The program connects Transition Age Youth (TAY) with community resources, jobs and educational opportunities. Psycho-education and support is also provided to family members as they are an important part of a young adult's support system and are critical in their success. Collaborative partners are: TAY, family members, communitybased youth serving organizations, juvenile probation, education, and social services.

Program/Program Group: Access AB109

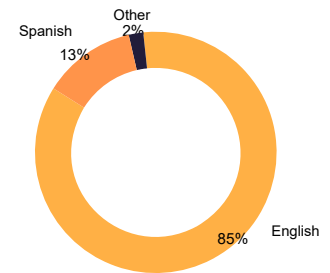

In the Access AB109 Program, Monterey County Behavioral Health clinical staff collaborate with Monterey County Probation Department to provide services to men and women on PRCS and 1170h split sentences with the primary goal of assisting in the reduction of recidivism risk by targeting factors that increase an individual's risk of reoffending. Behavioral Health services include clinical assessment, treatment planning, case management, crisis intervention, referrals to substance abuse treatment and/or specialty mental health services, medication management, brief individual therapy and evidence based practice groups to target criminogenic risks and needs as identified by the Ohio Risk Assessment System. Referrals made are part of a comprehensive approach used in an attempt to reduce recidivism and improve community safety by addressing identified risk factors.

Program/Program Group: Adult System of Care (ASOC)

Monterey County Behavioral Health staff collaborates with local agencies to provide a range of services to adults ages 18 years and older with serious and persistent mental illness. The overarching goal is to help consumers establish and/or maintain independence, self-sufficiency and recovery through the provision of integrated health care services that includes psychiatric, mental health, physical health and case management services. These services are provided at locations in three (3) regional clinics (Monterey Peninsula, Salinas, and Soledad/King City). The primary goal is to maintain clients in the least restrictive environment to enhance quality of life.

Program/Program Group: AS Creating New Choices FSP

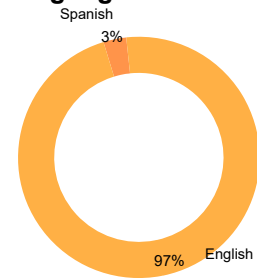

The Creating New Choices Program, or CNC is a collaborative effort between Behavioral Health, Probation, District Attorney, Public Defender and the Courts in Monterey County to provide intensive case management, psychiatric care, Probation supervision and therapeutic mental health court services to mentally ill offenders. CNC offers services in the Full Service Partnership or 'whatever it takes' model. Referral Process: Clients are referred to CNC through the court system. The court refers candidates to the CNC program either through a judge, public defender, district attorney or private counsel who believes a client meets the basic eligibility criteria.

Program/Program Group: AS Military Diversion

The California Military Diversion program establishes a pretrial diversion program for current and former members of the U.S. military who are charged with a misdemeanor offense. Under Penal Code section 1001.80, subdivision (a), the military diversion program applies to defendants accused of a misdemeanor offense who “was, or currently is, a member of the US military, and who “may be suffering from sexual trauma, traumatic brain injury [TBI], post-traumatic stress disorder [PTSD], substance abuse, or mental health problems as a result of his or her military service.” If a defendant meets this criteria, the court “may” place him or her into a pretrial diversion program. In Monterey County, the military diversion court is a judicially supervised collaboration court calendar which includes the District Attorney, Public Defender, Veteran’s Health Administration, Probation, Behavioral Health Bureau, Sheriff’s Office and other community partners with the goal of diverting active and former members of the military who meet this criteria from the criminal justice system and into treatment.

Program/Program Group: AS Older Adult FSP

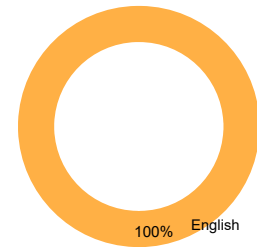

This is a full service partnership program providing services to adults 60 years + who have a serious and persistent mental illness with a co-occurring (physical and or/substance abuse) disorder who are risk of losing their community placement due to an ongoing chronic co-existing physical impairment. These adults are at risk of high utilization of unplanned emergency services and institutionalization requiring a higher level of care. These adults will benefit from intensive case management preventing further deterioration of their condition and enhancing their capacity to remain in the least restrictive environment. These services are designed to maximize their participation in their recovery and enhance their quality of life in the greater community.

Program/Program Group: AS VET Court

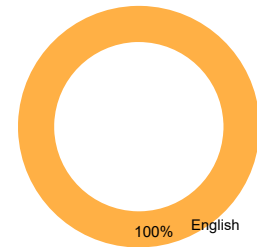

The mission of the Monterey Veteran's Treatment Court [VTC] is to promote public safety by assisting the veteran with regards to health, security, and well-being. This will be accomplished through a judicially supervised collaboration court calendar which includes the District Attorney, Public Defender, Veteran's Health Administration, Probation, the Behavioral Health Bureau [BHB], Sheriff's Office, and other community partners with the goal of reducing the veteran's contact with the criminal justice system for successful community reintegration. The Monterey County VTC is a voluntary program based on Penal Code section 1170.9, which provides judicial officers with the option of sentencing veteran's to treatment and probation instead of prison or jail if they have been convicted of certain classes of crimes, as long as there is medical evidence which concludes that there is a nexus between the veteran's mental health/medical issue and military service. Additionally, there are post-conviction restorative relief options, such as early termination of probation, financial forgiveness of some fines and fees, reducing an eligible felony to a misdemeanor or record clearance under Penal Code section 1203.4, that may be available to the veteran once treatment/probation has been successfully completed.

Program/Program Group: Drake House FSP

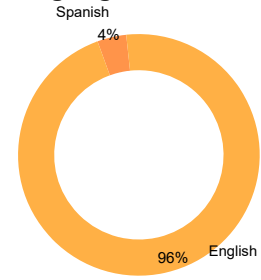

This is a full service partnership program providing services to adults 60 years + who have a serious and persistent mental illness with a co-occurring physical disorder that are risk of losing their community placement due to an ongoing chronic co-existing physical impairment. These older adult have had extensive histories of institutionalization or at high risk for a higher level of care, hospitalizations, unplanned emergency services and at high risk for skilled nursing care. Monterey County in collaboration with Drake House (Front Street) provides 24 hour residential care, intensive mental health and case management services. These older adults benefit from intensive case management preventing further deterioration of their condition and enhancing their capacity to remain in the least restrictive environment. The services are designed to maximize their participation in their recovery, and enhance their quality of life while living in their community.

Program/Program Group: Homeless FSP v2

The MCHOME program serves seriously mentally ill adults who are experiencing chronic homelessness or at risk of homelessness. Monterey County Behavioral Health, in collaboration with Interim, Inc., provides an array of services such as outreach and engagement, assessment and mental health treatment. This is a Full Service Partnership program providing intensive case management with 24/7 on-call services. It is considered a Housing First model, based upon the original AB2034 program. This model includes transitional housing options, as well as linkages to benefits, employment, education, and other supports.

Program/Program Group: Interim Manzanita House

Interim, Inc. will operate a licensed community-based short-term crisis residential program as an alternative to hospitalization in accordance with State of California Department of Mental Health (DMH). Crisis residential services can be therapeutic and/or rehabilitation services that are provided in a 24-hour residential treatment program for individuals experiencing an acute psychiatric episode or crisis, and who do not present criteria for acute psychiatric care. The program supports individuals in their efforts to restore, maintain and apply interpersonal and independent living skills, and access community support systems. Interventions, which focus on symptom reduction, shall also be available. Service activities shall include assessment, mental health treatment plan development, collateral, and linkage. Interim will also provide short-term emergency shelter for homeless mentally ill adults and Manzanita's nurse assistants provide a nurse consultant to assist in the development of a care plan for residents who have a co-existing medical condition.

Program/Program Group: Medical Hill Rehab Center

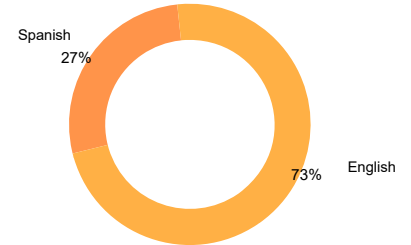

This program provide intensive residential treatment to severely mentally ill adults. This program offers a structured regimen with individualized services to assist clients in the development of new skills and modify behaviors that exclude residents from living in a lower level of care facility. This program offers special rehabilitation program services that develop both, interest and a sense of personal safety in socializing, which may increase self-care and activities of daily living, as well as encourage participation in the rehabilitation group structured activities. Services are provided in both, individually and in a group setting. Modifications to treatment are made as needed based on cognitive impairment

Program/Program Group: USC TELEHEALTH

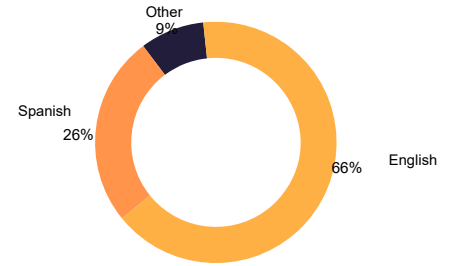

Telehealth is a virtual, outpatient clinic that provides behavioral health services using secure, videoconferencing technology. A program within the Suzanne Dworak-Peck School of Social Work at the University of Southern California in Los Angeles, Telehealth has partnered with the Monterey County Behavioral Health Bureau to establish 3 tele-suites in Salinas and South Monterey County regions where clients may participate in individual therapy using a remote, videoconferencing platform. Clients are Monterey County residents living in underserved, vulnerable communities who are ages 12 and above, including adolescents, transitional age youth, adults, and older adults experiencing mild to moderate psychosocial problems or mental health conditions.

Program/Program Group: Access Post-Hospital/Crisis follow-up

The Adult Post Hospital Team provides support to beneficiaries who are transitioning from hospital inpatient or emergency department care due to a primary psychiatric or substance use condition, and are in need of establishing new outpatient Behavioral Health services. The Adult Post Hospital Team provides discharge coordination support for adults newly referred to Behavioral Health to help ensure timely access and linkage to follow-up outpatient Behavioral Health care by providing assessment, short term case management, linkage, referrals, medication management, and other supportive services to help individuals access needed resources to help them stabilize in the community following discharge from a hospital setting. Established clients will be redirected to their existing treatment teams for ongoing care coordination and discharge planning support.

Program/Program Group: CS CHERISH

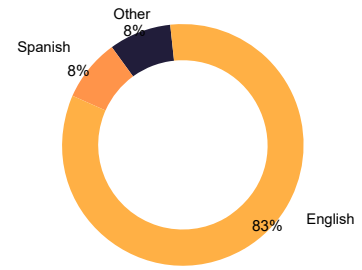

The Cherish Center was established in Monterey County by the Department of Social Services (DSS) as a temporary receiving center for all children who are assessed for removal from home due to allegations of severe abuse and/or neglect. The Cherish Center was designed to be a friendly and inviting home-like setting for children and youth to receive emotional support and physical care from the Center's child care staff, while the DSS social worker completes an investigation and explores possible placement options for the child(ren). While a child may remain at the Center for as long as 23 hours, the average length of stay is approximately 8 to 10 hours. The Cherish Center therapist provides a brief mental health assessment for virtually all children who enter the Center, provides guidance to the Center staff on responding to emotional or behavioral problems, and is available to provide support and guidance to caretakers after the child has been placed in foster care or with relatives.

Program/Program Group: Emergency Department Access

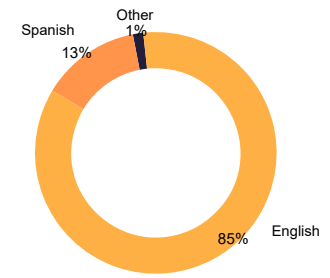

Crisis intervention services are provided by a team of County Behavioral Health staff who intervene in situations where an individual's mental or emotional condition results in behavior that may pose an imminent danger to him/herself or to another. Psychiatric inpatient treatment in a hospital setting is provided to individuals who are gravely disabled or likely to do serious harm. Short-term crisis residential services, an alternative to hospitalization, is available for individuals age 18 and above who are experiencing an acute psychiatric episode or crisis, and who do not meet the criteria for acute psychiatric inpatient care. This service is provided by a local agency. State hospitals provide mental health services for individuals on a forensic commitment, as well as for individuals who are under conservatorship and require a secure treatment setting. These facilities also provide specialized rehabilitation, education, and psychiatric services for individuals committed under the legal classification Incompetent to Stand Trial.

Program/Program Group: MCBH Access Crisis Team

The Community Crisis Services team responds to calls for crisis support that come through the 24/7 Access Crisis Line as well as the Emergency Communications / 911 dispatch center, and provides brief crisis intervention, de-escalation, triage, risk / safety assessment, referral and linkage to individuals and families experiencing behavioral health crisis in the community. The team works in an integrated and supportive manner providing mobile crisis field response when appropriate both in conjunction with and independently of law enforcement and other first responder partners depending on the situation. The team can provide law enforcement and other treatment providers with specialized assistance in responding to individuals, youth, and families in crisis. They collaborate to recognize the signs of psychiatric distress; work to deescalate a mental health crisis; provide resources, and link people with voluntary outpatient services and/or treatment as appropriate. This team seeks to provide support to stabilize the situation in the community to avoid unnecessary hospitalizations and divert from emergency resources (hospital/jail) when appropriate while providing linkage to ongoing care as needed. They facilitate involuntary hospitalization when clinically indicated and act as liaisons with emergency personnel as well as receiving hospitals or providers for continuity of care. The team works collaboratively with other Behavioral Health programs and hospital partners for continuity of care as well as discharge planning coordination to ensure timely access to needed ongoing services following a hospitalization for a behavioral health crisis. They also provide follow-up and outreach and engagement services in the community in response to referrals.

Program/Program Group: CHS Intensive Services

Intensive outpatient (IOP) programs for substance use disorders offer services to clients seeking primary treatment; step-down care from inpatient, residential, and withdrawal management settings; or step-up treatment from individual or group outpatient treatment. IOP treatment includes a prearranged schedule of core services (e.g., individual counseling, group therapy, family psycho-education, and case management [CM]) for a minimum of 9 hours per week for adults or 6 hours per week for adolescents (Mee-Lee et al., 2013). To help clients fulfill their individualized treatment plan goals, IOP services may incorporate other in-house treatment and peer services, encourage clients' attendance at mutual-support groups, and collaborate with local community providers to secure needed services (e.g., medication-assisted treatment, psychological assessments, vocational rehabilitation services, and trauma-specific treatment).

Program/Program Group: Door to Hope - Intensive

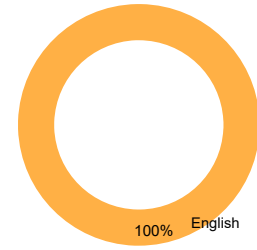

Intensive outpatient (IOP) programs for substance use disorders offer services to clients seeking primary treatment; step-down care from inpatient, residential, and withdrawal management settings; or step-up treatment from individual or group outpatient treatment. IOP treatment includes a prearranged schedule of core services (e.g., individual counseling, group therapy, family psycho-education, and case management[CM]) for a minimum of 9 hours per week for adults or 6 hours per week for adolescents (Mee-Lee et al.,2013). To help clients fulfill their individualized treatment plan goals, IOP services may incorporate other in-house treatment and peer services, encourage clients' attendance at mutual-support groups, and collaborate with local community providers to secure needed services (e.g., medication-assisted treatment, psychological assessments, vocational rehabilitation services, and trauma-specific treatment).

Program/Program Group: Door to Hope Outpatient

Outpatient Treatment Centers allow men and women to receive treatment for drug or alcohol addiction while continuing with their daily activities, school or work. Services include comprehensive assessment, medical evaluation, individualized treatment planning, individual, group and family counseling, trauma and crisis counseling, education on addiction, recovery and communicable illness, introduction to 12-step programs, relapse prevention and coping skills, drug testing, information and referral to other community resources, discharge planning and continuing care support groups. The programs utilize several evidence-based best practices, including Seeking Safety, Motivational Interviewing and Thinking for a Change. Medication assistance, such as buprenorphin or suboxone, may be available if medically indicated.

Breakdown of Services Provided

This chart displays the type of service that was provided. For each type of service you will see the total number of visits, the total number of service minutes and the percent of total service minutes.

Client Discharge Disposition

This chart reflects the clients discharged in the last fiscal year, the discharge disposition— indicating how many of the clients discharged from the program were discharged with treatment goals met or partially met. Transferred to Another Treatment Facility, The “other” category includes discharge due to program decisions, inability to reach clients, client death etc.

Primary Insurance Source of Clients Served	% of clients served
Medi-Cal	74%
Medicare B	16%
Private Insurance	4%
Self Pay/Other	6%

Primary Insurance Source of Clients Served

This chart displays the percentage of clients served by type of Primary Insurance Payer Source

The Reasons for Client Discharge Have Been Combined in to Three Categories

Tranferred to Another Treatment Facility

- Tranferred to Another Treatment Facility

Treatment Goals Reached/Partially Reached

- Treatment Goals Reached
- No Further Care Needed at This Facility
- Treatment Goals Partially Reached

Other

- Pre-admission Discharge
- Death
- Discharge From (Other) Leave Status (Inactive)
- Discharge From Elopement Status (Inactive)
- Reason Not Available
- Service Needed Unavailable At Facility
- Treatment Goals Not Reached
- Client AWOL/AMA
- Unable To Contact Client
- Client Moved
- Client Discharged, Program Decision
- Client Incarceration
- Client Declined Services

(F43.21)	Adjustment disorder with depressed mood
(F43.24)	Adjustment disorder with disturbance of conduct
(F43.23)	Adjustment disorder with mixed anxiety and depressed mood
(F43.25)	Adjustment disorder with mixed disturbance of emotions and conduct
(F43.29)	Adjustment disorder with other symptoms
(F43.20)	Adjustment disorder, unspecified
(F40.01)	Agoraphobia with panic disorder
(F40.02)	Agoraphobia without panic disorder
(F40.00)	Agoraphobia, unspecified
(F41.9)	Anxiety disorder, unspecified
(F45.22)	Body dysmorphic disorder
(F40.240)	Claustrophobia
(F44.7)	Conversion disorder with mixed symptom presentation
(F44.4)	Conversion disorder with motor symptom or deficit
(F44.5)	Conversion disorder with seizures or convulsions
(F48.1)	Depersonalization-derealization syndrome
(F44.0)	Dissociative amnesia
(F44.9)	Dissociative and conversion disorder, unspecified
(F44.1)	Dissociative fugue
(F44.81)	Dissociative identity disorder
(F42.4)	Excoriation (skin-picking) disorder
(F40.230)	Fear of blood
(F40.231)	Fear of injections and transfusions
(F40.233)	Fear of injury
(F40.232)	Fear of other medical care
(F41.1)	Generalized anxiety disorder
(F42.3)	Hoarding disorder
(F45.21)	Hypochondriasis
(F42.2)	Mixed obsessional thoughts and acts
(F48.9)	Nonpsychotic mental disorder, unspecified
(F42)	Obsessive-compulsive disorder
(F42.9)	Obsessive-compulsive disorder, unspecified
(F40.218)	Other animal type phobia
(F44.89)	Other dissociative and conversion disorders
(F41.3)	Other mixed anxiety disorders
(F40.228)	Other natural environment type phobia
(F42.8)	Other obsessive-compulsive disorder
(F43.8)	Other reactions to severe stress
(F40.248)	Other situational type phobia
(F45.8)	Other somatoform disorders
(F41.8)	Other specified anxiety disorders
(F48.8)	Other specified nonpsychotic mental disorders
(F40.298)	Other specified phobia
(F45.41)	Pain disorder exclusively related to psychological factors
(F45.42)	Pain disorder with related psychological factors
(F41.0)	Panic disorder [episodic paroxysmal anxiety]
(F41.0)	Panic disorder [episodic paroxysmal anxiety] without agoraphobia
(F40.9)	Phobic anxiety disorder, unspecified
(F43.11)	Post-traumatic stress disorder, acute
(F43.12)	Post-traumatic stress disorder, chronic
(F43.10)	Post-traumatic stress disorder, unspecified
(F48.2)	Pseudobulbar affect
(F43.9)	Reaction to severe stress, unspecified
(F40.11)	Social phobia, generalized
(F40.10)	Social phobia, unspecified
(F45.0)	Somatization disorder
(F45.9)	Somatoform disorder, unspecified
(F45.1)	Undifferentiated somatoform disorder

Diagnosis Categories

Disruptive Behavior Disorders

(F98.0)	
(F90.2)	Attention-deficit hyperactivity disorder, combined type
(F90.8)	Attention-deficit hyperactivity disorder, other type
(F90.1)	Attention-deficit hyperactivity disorder, predominantly hyperactive type
(F90.0)	Attention-deficit hyperactivity disorder, predominantly inattentive type
(F90.9)	Attention-deficit hyperactivity disorder, unspecified type
(F90.1)	Attn-defct hyperactivity disorder, predom hyperactive type
(F90.0)	Attn-defct hyperactivity disorder, predom inattentive type
(F94.9)	Childhood disorder of social functioning, unspecified
(F93.9)	Childhood emotional disorder, unspecified
(F95.1)	Chronic motor or vocal tic disorder
(F91.0)	Conduct disorder confined to family context
(F91.2)	Conduct disorder, adolescent-onset type
(F91.1)	Conduct disorder, childhood-onset type
(F91.9)	Conduct disorder, unspecified
(F94.2)	Disinhibited attachment disorder of childhood
(F98.1)	Encopresis not due to a substance or known physiological condition
(F98.0)	Enuresis not due to a substance or known physiological condition
(F91.3)	Oppositional defiant disorder
(F98.8)	Oth behav/emotn disord w onset usly occur in chldhd and adol
(F94.8)	Other childhood disorders of social functioning
(F93.8)	Other childhood emotional disorders
(F91.8)	Other conduct disorders
(F98.29)	Other feeding disorders of infancy and early childhood
(F98.8)	Other specified behavioral and emotional disorders with onset usually occurring in childhood and
(F95.8)	Other tic disorders
(F98.3)	Pica of infancy and childhood
(F94.1)	Reactive attachment disorder of childhood
(F98.21)	Rumination disorder of infancy
(F94.0)	Selective mutism
(F93.0)	Separation anxiety disorder of childhood
(F95.9)	Tic disorder, unspecified
(F95.2)	Tourette's disorder
(F95.2)	Tourette's disorder
(F95.0)	Transient tic disorder
(F98.9)	Unsp behav/emotn disord w onst usly occur in chldhd and adol
(F98.9)	Unspecified behavioral and emotional disorders with onset usually occurring in childhood and ad

Feeding/Eating Disorders

(F55.8)	Abuse of other non-psychoactive substances
(F51.02)	Adjustment insomnia
(F50.02)	Anorexia nervosa, binge eating/purging type
(F50.01)	Anorexia nervosa, restricting type
(F50.00)	Anorexia nervosa, unspecified
(F50.82)	Avoidant/restrictive food intake disorder
(F50.81)	Binge eating disorder
(F50.2)	Bulimia nervosa
(F52.6)	Dyspareunia not due to a substance or known physiological condition
(F50.9)	Eating disorder, unspecified
(F51.05)	Insomnia due to other mental disorder
(F51.5)	Nightmare disorder
(F51.8)	Oth sleep disord not due to a sub or known physiol cond
(F50.8)	Other eating disorders
(F52.8)	Other sexual dysfunction not due to a substance or known physiological condition
(F50.89)	Other specified eating disorder
(F53.0)	Postpartum depression
(F51.01)	Primary insomnia
(F54)	Psychological and behavioral factors associated with disorders or diseases classified elsewhere
(F51.04)	Psychophysilogic insomnia
(F53)	Puerperal psychosis
(F51.9)	Sleep disorder not due to a substance or known physiological condition, unspecified

Diagnosis Categories

(F51.4)	Sleep terrors [night terrors]
(F52.9)	Unspecified sexual dysfunction not due to a substance or known physiological condition

Mood Disorders

(F33.2)	
(F31.11)	Bipolar disord, crnt episode manic w/o psych features, mild
(F31.12)	Bipolar disord, crnt episode manic w/o psych features, mod
(F31.10)	Bipolar disord, crnt episode manic w/o psych features, unsp
(F31.64)	Bipolar disord, crnt episode mixed, severe, w psych features
(F31.30)	Bipolar disord, crnt epsd depress, mild or mod severt, unsp
(F31.4)	Bipolar disord, crnt epsd depress, sev, w/o psych features
(F31.5)	Bipolar disord, crnt epsd depress, severe, w psych features
(F31.13)	Bipolar disord, crnt epsd manic w/o psych features, severe
(F31.63)	Bipolar disord, crnt epsd mixed, severe, w/o psych features
(F31.70)	Bipolar disord, currently in remis, most recent episode unsp
(F31.31)	Bipolar disorder, current episode depressed, mild
(F31.30)	Bipolar disorder, current episode depressed, mild or moderate severity, unspecified
(F31.32)	Bipolar disorder, current episode depressed, moderate
(F31.5)	Bipolar disorder, current episode depressed, severe, with psychotic features
(F31.4)	Bipolar disorder, current episode depressed, severe, without psychotic features
(F31.0)	Bipolar disorder, current episode hypomanic
(F31.2)	Bipolar disorder, current episode manic severe with psychotic features
(F31.11)	Bipolar disorder, current episode manic without psychotic features, mild
(F31.12)	Bipolar disorder, current episode manic without psychotic features, moderate
(F31.13)	Bipolar disorder, current episode manic without psychotic features, severe
(F31.10)	Bipolar disorder, current episode manic without psychotic features, unspecified
(F31.61)	Bipolar disorder, current episode mixed, mild
(F31.62)	Bipolar disorder, current episode mixed, moderate
(F31.64)	Bipolar disorder, current episode mixed, severe, with psychotic features
(F31.63)	Bipolar disorder, current episode mixed, severe, without psychotic features
(F31.60)	Bipolar disorder, current episode mixed, unspecified
(F31.70)	Bipolar disorder, currently in remission, most recent episode unspecified
(F31.76)	Bipolar disorder, in full remission, most recent episode depressed
(F31.72)	Bipolar disorder, in full remission, most recent episode hypomanic
(F31.74)	Bipolar disorder, in full remission, most recent episode manic
(F31.78)	Bipolar disorder, in full remission, most recent episode mixed
(F31.75)	Bipolar disorder, in partial remission, most recent episode depressed
(F31.71)	Bipolar disorder, in partial remission, most recent episode hypomanic
(F31.73)	Bipolar disorder, in partial remission, most recent episode manic
(F31.77)	Bipolar disorder, in partial remission, most recent episode mixed
(F31.9)	Bipolar disorder, unspecified
(F31.81)	Bipolar II disorder
(F34.0)	Cyclothymic disorder
(F34.81)	Disruptive mood dysregulation disorder
(F34.1)	Dysthymic disorder
(F33.2)	Major depressive disorder, recurrent severe without psychotic features
(F33.42)	Major depressive disorder, recurrent, in full remission
(F33.41)	Major depressive disorder, recurrent, in partial remission
(F33.40)	Major depressive disorder, recurrent, in remission, unspecified
(F33.0)	Major depressive disorder, recurrent, mild
(F33.1)	Major depressive disorder, recurrent, moderate
(F33.3)	Major depressive disorder, recurrent, severe with psychotic symptoms
(F33.9)	Major depressive disorder, recurrent, unspecified
(F32.5)	Major depressive disorder, single episode, in full remission
(F32.4)	Major depressive disorder, single episode, in partial remission
(F32.0)	Major depressive disorder, single episode, mild
(F32.1)	Major depressive disorder, single episode, moderate
(F32.3)	Major depressive disorder, single episode, severe with psychotic features
(F32.2)	Major depressive disorder, single episode, severe without psychotic features
(F32.9)	Major depressive disorder, single episode, unspecified
(F32.2)	Major depressv disord, single epsd, sev w/o psych features
(F32.3)	Major depressv disord, single epsd, severe w psych features
(F30.3)	Manic episode in partial remission

Diagnosis Categories

(F30.11)	Manic episode without psychotic symptoms, mild
(F30.12)	Manic episode without psychotic symptoms, moderate
(F30.10)	Manic episode without psychotic symptoms, unspecified
(F30.2)	Manic episode, severe with psychotic symptoms
(F30.13)	Manic episode, severe, without psychotic symptoms
(F30.9)	Manic episode, unspecified
(F31.89)	Other bipolar disorder
(F32.8)	Other depressive episodes
(F30.8)	Other manic episodes
(F34.8)	Other persistent mood [affective] disorders
(F33.8)	Other recurrent depressive disorders
(F32.89)	Other specified depressive episodes
(F34.89)	Other specified persistent mood disorders
(F34.9)	Persistent mood [affective] disorder, unspecified
(F32.81)	Premenstrual dysphoric disorder
(F39)	Unspecified mood [affective] disorder

Neurodevelopmental Disorders

(F84.0)	
(F84.5)	Asperger's syndrome
(F84.5)	Asperger's syndrome
(F84.0)	Autistic disorder
(F80.81)	Childhood onset fluency disorder
(F81.9)	Developmental disorder of scholastic skills, unspecified
(F80.9)	Developmental disorder of speech and language, unspecified
(F81.81)	Disorder of written expression
(F80.1)	Expressive language disorder
(F81.2)	Mathematics disorder
(F70)	Mild intellectual disabilities
(F80.2)	Mixed receptive-expressive language disorder
(F71)	Moderate intellectual disabilities
(F81.89)	Other developmental disorders of scholastic skills
(F80.89)	Other developmental disorders of speech and language
(F88)	Other disorders of psychological development
(F84.8)	Other pervasive developmental disorders
(F84.9)	Pervasive developmental disorder, unspecified
(F80.0)	Phonological disorder
(F73)	Profound intellectual disabilities
(F72)	Severe intellectual disabilities
(F80.82)	Social pragmatic communication disorder
(F82)	Specific developmental disorder of motor function
(F81.0)	Specific reading disorder
(F89)	Unspecified disorder of psychological development
(F79)	Unspecified intellectual disabilities

Organic Disorders

(F03.90)	
(F04)	Amnestic disorder due to known physiological condition
(F06.4)	Anxiety disorder due to known physiological condition
(F06.1)	Catatonic disorder due to known physiological condition
(F05)	Delirium due to known physiological condition
(F02.81)	Dementia in oth diseases clasd elswhr w behavioral disturb
(F02.80)	Dementia in oth diseases clasd elswhr w/o behavrl disturb
(F02.81)	Dementia in other diseases classified elsewhere with behavioral disturbance
(F02.80)	Dementia in other diseases classified elsewhere without behavioral disturbance
(F06.31)	Mood disorder due to known physiol cond w depressv features
(F06.31)	Mood disorder due to known physiological condition with depressive features
(F06.32)	Mood disorder due to known physiological condition with major depressive-like episode
(F06.34)	Mood disorder due to known physiological condition with mixed features
(F06.30)	Mood disorder due to known physiological condition, unspecified
(F06.8)	Other specified mental disorders due to known physiological condition
(F07.0)	Personality change due to known physiological condition
(F07.81)	Postconcussional syndrome

Diagnosis Categories

(F06.0)	Psychotic disorder w hallucin due to known physiol condition
(F06.2)	Psychotic disorder with delusions due to known physiological condition
(F06.0)	Psychotic disorder with hallucinations due to known physiological condition
(F03.91)	Unspecified dementia with behavioral disturbance
(F03.90)	Unspecified dementia without behavioral disturbance
(F09)	Unspecified mental disorder due to known physiological condition
(F01.51)	Vascular dementia with behavioral disturbance
(F01.50)	Vascular dementia without behavioral disturbance

Personality Disorders

(F63.89)	
(F60.2)	Antisocial personality disorder
(F60.6)	Avoidant personality disorder
(F60.3)	Borderline personality disorder
(F60.7)	Dependent personality disorder
(F65.2)	Exhibitionism
(F68.10)	Factitious disorder imposed on self, unspecified
(F68.11)	Factitious disorder w predom psych signs and symptoms
(F68.12)	Factitious disorder with predominantly physical signs and symptoms
(F68.10)	Factitious disorder, unspecified
(F65.0)	Fetishism
(F64.1)	Gender identity disorder in adolescence and adulthood
(F64.2)	Gender identity disorder of childhood
(F64.9)	Gender identity disorder, unspecified
(F60.4)	Histrionic personality disorder
(F63.9)	Impulse disorder, unspecified
(F63.81)	Intermittent explosive disorder
(F63.2)	Kleptomania
(F60.81)	Narcissistic personality disorder
(F60.5)	Obsessive-compulsive personality disorder
(F64.8)	Other gender identity disorders
(F63.89)	Other impulse disorders
(F66)	Other sexual disorders
(F60.89)	Other specific personality disorders
(F68.8)	Other specified disorders of adult personality and behavior
(F60.0)	Paranoid personality disorder
(F65.9)	Paraphilia, unspecified
(F63.0)	Pathological gambling
(F65.4)	Pedophilia
(F60.9)	Personality disorder, unspecified
(F60.1)	Schizoid personality disorder
(F64.0)	Transsexualism
(F63.3)	Trichotillomania
(F69)	Unspecified disorder of adult personality and behavior

Schizophrenia Spectrum

(F23)	Brief psychotic disorder
(F20.2)	Catatonic schizophrenia
(F22)	Delusional disorders
(F20.1)	Disorganized schizophrenia
(F28)	Oth psych disorder not due to a sub or known physiol cond
(F28)	Other psychotic disorder not due to a substance or known physiological condition
(F25.8)	Other schizoaffective disorders
(F20.89)	Other schizophrenia
(F20.0)	Paranoid schizophrenia
(F20.5)	Residual schizophrenia
(F25.0)	Schizoaffective disorder, bipolar type
(F25.1)	Schizoaffective disorder, depressive type
(F25.9)	Schizoaffective disorder, unspecified
(F20.9)	Schizophrenia, unspecified
(F20.81)	Schizophreniform disorder
(F21)	Schizotypal disorder
(F24)	Shared psychotic disorder

Diagnosis Categories

(F20.3)	Undifferentiated schizophrenia
(F29)	Unsp psychosis not due to a substance or known physiol cond
(F29)	Unspecified psychosis not due to a substance or known physiological condition

Substance Related Addictive D/O
