

Salinas has been my proud home for well over a decade; and there is no place more special to me than Hartnell College. My educational journey through Hartnell was guided by the genuine care and dedication of my professors and the staff that prioritized the success of me and my fellow colleagues.

Inspired by the principles during my journey I found a passion to serve our community and instill the same ideas as an IT Administrator for NMCUSD. My time at the district has allowed me unique opportunities to interact and be a part of CSEA discussions. Throughout my involvement with CSEA, I have advocated for employee's rights and fair labor practices with the goal of providing the same positive impact for our community that I have received.

My strengths in education and technology allow me to have a nuanced understanding of the opportunities and challenges that our college faces on both small and large scales. These skillsets allow me to enhance the educational environment at Hartnell College while also supporting the success of our students and faculty. With my experience I will strive to create an environment where everyone can reach their full potential while adapting to new and growing technologies.
