

As a dedicated public servant with extensive experience in special districts, I am eager to bring my expertise to the Soledad Community Health Care District. Currently serving as the CEO of the Monterey County Mosquito Abatement District, I have honed my skills in managing complex operations, ensuring public safety, and fostering community engagement. My background is bolstered by multiple certifications specializing in special districts, reflecting my commitment to professional development and excellence in public service.

I have had the privilege of serving on various boards, including my tenure as president of a mosquito association and my current role as a board member of a Joint Powers Authority (JPA). These experiences have equipped me with a deep understanding of governance, strategic planning, and collaborative decision-making, all of which are critical to the success of the Soledad Community Health Care District.

I am committed to ensuring that our community has access to the highest quality health care services. With my background and dedication, I am confident that I can contribute effectively to the district's mission and work collaboratively to address the evolving health care needs of our community. I would be honored to serve and bring my experience and passion to the Soledad Community Health Care District.
