### MONITORING REQUIREMENTS NOT MET FOR San Antonio Lake Park North WS

Our water system failed to monitor as required for drinking water standards during the past year and, therefore, was in violation of the regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened, and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2021 and 2023, we did not collect a source sample for nitrate and therefore, cannot be sure of the quality of our drinking water during that time.

What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant(s) we did not properly test for during the last year, how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant Required Sampling Frequency Number of Samples Taken When All Samples Should Have Been Taken When Samples Were or Will Be Taken

Contaminant	Required Sampling Frequency	Number of Samples Taken	When All Samples Should Have Been Taken	When Samples Were or Will Be Taken
Nitrate	once	none	2021 and 2023	20'-Collected 11/14/2022 23'-Collected 2/22/2024

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.
