

Impact PSU-2: Increased Demand for Police Services (Less than Significant with Mitigation)

The Proposed Project would increase demand for police services by increasing the number of permanent residents in Carmel Valley, an unincorporated area of Monterey County. The project assumes a total population of 849 persons at build out (see RCV Specific Plan, Appendix B).

The Monterey County Sheriffs Office requires each project applicant to satisfactorily comply with the Monterey County Public Safety and Security Guidelines, as well as with specific guidelines tailored to the project for both private and commercial development. Compliance with these guidelines would improve public safety and security of the Proposed Project.

The Monterey County Sheriff's Office strives to maintain a service standard of one deputy per 1,000 persons. The 2003 ratio of deputies per residents was 1:1,250 and the department has since lost 44.5 positions (Galletti pers. comm.). This coupled with the increasing population of the area *may (strike may and add would)* lead to delayed response times for service calls *to the Carmel Valley area* (Galletti pers. comm.).

The Monterey County Sheriff's Office has reviewed the impacts to the Sheriff's services that would be caused by this project and finds that these impacts would be *significant* (Galletti pers. comm.). This impact can be reduced to a *less-thansignifleant* level with implementation of the following mitigation measure.

Mitigation Measure PSU-1: Ensure Adequate Police Funding

The applicant and the Sheriff's Office shall develop a funding mechanism to ensure that adequate funding is available for police service within the Rancho Canada Village area. This funding shall be sufficient to cover the cost of additional *staff and associated (strike staff and associated)* equipment to meet this increased demand.

The Sheriff's Office has determined that the impact to police services can be mitigated through funding allocations made by the applicant. While no new facilities for police services would be required to meet the increased demand, these funds would be used to provide additional *staff and associated (strike staff and associated)* equipment

Jaqueline,

Please see attached for edits. The Capt. put those words to be deleted in purple and the words to be added in red. There are only a couple.
Thanks again,

Donna
